

Clinical Safety Training Quiz 2026

Personal Safety

1. The Workplace Safety program (WPS) is a Kaiser Permanente initiative to promote a safe work environment with the ultimate goal of eliminating workplace injuries.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
X	True
	False

2. Employees at all levels should report any unsafe conditions or practices they observe. Hazards at your work-site can be reported without fear of reprisal. Unsafe conditions or practices can be reported to:

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	A member of the Safety Committee
	An immediate Supervisor or to an EH&S or WPS Office
	The hotline established at your facility or KP Compliance Hotline.
X	All of the above

3. Employees should wait 24-48 hours before reporting a work-related injury, illness, or incident (including exposure to infectious diseases or unsafe working condition) to their supervisor.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
	True

Correct	Choice
X	False

4. General tips to avoid back strain during lifting are:

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	Don't twist when lifting
	Lift objects only chest high
	Lift object by bending your knees, not your back
	Do not reach or stretch while attempting to lift or place an object
	Keep the object close to your body
	Whenever possible, use mechanical help such as a hand-truck or cart
X	All of the above

5. If you cannot adjust your workstation so that it is comfortable for you, or if you are experiencing pain which you believe is caused by incorrect ergonomics, notify your supervisor and find out how to request an ergonomic evaluation.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
X	True
	False

6. Which of the following are true about Federal OSHA Standard 29 CFR 1910.1020 - "Access to Employee Exposure and Medical Records"? (CHECK ALL THAT APPLY)

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	This training is your notification of rights under 29 CFR 1910.1020 (Access to Employee Exposure and Medical Records).
X	You must know how to contact your Employee Health Department, or whomever is responsible for maintaining and providing access to Employee Exposure and Medical Records at your workplace.
	You are never allowed to see your Employee Exposure and Medical Records

7. Kaiser Employee Identification Badges must be (select all that apply).

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	worn at all times while at work
X	worn above the waist
X	attached to the outer most garment
X	clearly visible

8. Kaiser Permanente has a Zero Tolerance Policy of Threatening Behavior.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
X	True
	False

9. Only members of the EVS/Housekeeping department can clean up a spill, even if the liquid is non-hazardous.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
	True
X	False

10. Hazards in a health care setting that would require PPE are:

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	Biohazards (potentially infectious body fluids)
X	Penetration hazards (sharp objects, broken glass)
X	Non-ionizing radiation (lasers)
X	Chemical hazards – through exposure to skin or vapors
X	Noise hazards (lawn mowers, generators)
	Fire alarms

11. Examples of PPE commonly used by health care workers include:

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	Gloves
X	Eye Protection
X	Respiratory Protection

Correct	Choice
X	Protective Clothing
	Hard Hat

Infection Prevention and Control

1. Personal Protective Equipment (PPE) appropriate for protection from BBP exposure may include gloves, masks, face shields, aprons and gowns. These should be worn when there is a possibility of an exposure to blood or body fluids.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
X	True
	False

2. A patient suspected of having TB disease (Active TB) must wear a surgical mask when being transported outside of a negative pressure Airborne Infection Isolation room.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
X	True
	False

3. High risk procedures that may generate significant amounts of aerosolized infectious particles when performed on a TB patient include all except the following:

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	Endotracheal intubation and suctioning

Correct	Choice
	Laryngoscopy and bronchoscopy
X	Taking blood pressure
	Sputum induction

4. Hepatitis B vaccine must be offered to all employees at risk for blood or body fluid contact and is strongly recommended for all employees.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
X	True
	False

5. When following Standard Precautions, the blood and body fluids of which patients should be considered potentially infectious? (Select the BEST answer only)

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	Hospitalized patients
	HIV Positive patients
	Infectious patients
X	All patients

6. If you have been exposed to blood or OPIM through unprotected contact with blood or body fluids, you should: (check ALL that apply)

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	Wash or rinse the exposed area immediately and thoroughly.
X	IMMEDIATELY follow your regional procedure for reporting an exposure. (This may include notifying your department manager and contacting Employee Health.)
	Go home and call 911.
	Ignore it.

7. OSHA requires that staff wearing an N95 respirator, elastomeric respirator or Powered Air-Purifying Respirator (PAPR) for protection against TB receive training on the respirator they are assigned to use:

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	Once at the start of employment
	Every five years
X	Initially and annually
	Monthly

Chemical Safety

1. Under the Hazard Communication standard, you have a "Right to Know" all of the operations in your work area where hazardous chemicals are present, protective measures to work with them, and how to access your chemical inventories and associated Safety Data Sheets.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
X	True
	False

2. What information is included on the SDS? (select all that apply)

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	First Aid Measures
X	Handling & Storage
X	Hazard Identification
X	Physical and Chemical Properties
	Container Size/Weight

3. Fume hoods are an example of an engineering control.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
X	True
	False

4. Danger or warning pictograms on the label provide information about the hazards of the product that employees should be aware of.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
X	True
	False

5. Secondary labels are intended for use when hazardous chemicals are transferred from a primary container into a secondary container. They are optional.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
	True
X	False

6. All compressed gas cylinders must be upright and secured to a fixed object or held in a portable transport cart/holder.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
X	True
	False

7. Which of the following are true about Emergency Deluge Showers? (CHECK ALL THAT APPLY)

(Multiple Response, 10 points, 1 attempt permitted)

Correct Choice	
X	To activate the emergency shower, pull down on the activation mechanism until the water starts
X	They are located in areas where it's possible that certain hazardous chemicals may splash over substantial areas of your body
X	Continue under the shower for 15 minutes before seeking medical attention

Emergency Preparedness

1. In the event of a fire remember R.A.C.E., which stands for Rescue/Remove, Alarm, Confine/Clear, and Extinguish/Evacuate.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
X	True
	False

2. To use a portable fire extinguisher, remember P.A.S.S., which stands for Pause, Aim, Stop, and Shout!

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
	True
X	False

3. All employees are required to participate in at least one fire drill every year.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
X	True
	False

4. When it comes to Emergency Preparedness, you should know... (CHECK ALL THAT APPLY)

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	The evacuation routes for your work area
X	The location of your building's safety equipment
X	Your building's emergency plan, policies and protocols

Electrical Safety

1. Who is authorized to remove a lockout or tagout device?

(Multiple Choice, 20 points, 1 attempt permitted)

Correct	Choice	Feedback
	The manager or supervisor responsible for the given area	
	The Environmental, Health and Safety Officer	
	Any employee	Incorrect - The lock or tag can only be removed by the authorized person who applied the given lockout or tagout device.

Correct	Choice	Feedback
X	Only the authorized person who applied the lockout or tagout device	Correct! The lock or tag can only be removed by the authorized person who applied the given lockout or tagout device.

2. What is the purpose of an Energy Control (Lockout/Tagout) program?

(Multiple Choice, 20 points, 1 attempt permitted)

Correct	Choice	Feedback
	To allow equipment to be used while being repaired	
X	To prevent injury from the unexpected start-up or re-energization of equipment or machines while performing maintenance or servicing activities.	Correct! It's to keep people safe from harm.
	Because the equipment warranty is void if someone activates equipment improperly	
	Because I don't have enough things to worry about	Incorrect - it's to prevent employees from being hurt when equipment starts unexpectedly.

3. When you have malfunctioning equipment, you should tag, remove and report it.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
X	True
	False

4. Which of the following are potentially hazardous energy sources? Select all that apply.

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	Electricity
X	Compressed Air
X	X-Ray
X	Hydraulic line forces

5. If you see a tag that has fallen off, you should inform your supervisor and the maintenance person identified on the tag immediately.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
X	True
	False

Lockout-Tagout

1. *Who is authorized to remove a lockout or tagout device?*

(Multiple Choice, 20 points, 1 attempt permitted)

Correct	Choice	Feedback
	The manager or supervisor responsible for the given area	Incorrect - The lock or tag can only be removed by the authorized person who applied the given lockout or tagout device.
	The Environmental, Health and Safety Officer	Incorrect - The lock or tag can only be removed by the authorized person who applied the given lockout or tagout device.

Correct Choice		Feedback
	Any employee	Incorrect - The lock or tag can only be removed by the authorized person who applied the given lockout or tagout device.
X	Only the authorized person who applied the lockout or tagout device	Correct! The lock or tag can only be removed by the authorized person who applied the given lockout or tagout device.

2. This picture shows a lockout and a tagout. Which of the following are true? (SELECT ALL THAT APPLY)

(Multiple Response, 10 points, 1 attempt permitted)

Correct Choice	
X	Lockouts and tagouts are warning devices for a piece of equipment, and they keep engineers and other staff safe
	It's okay to remove a lockout or tagout device any time you want to

3. What is the purpose of an Energy Control (Lockout/Tagout) program?

(Multiple Choice, 20 points, 1 attempt permitted)

Correct Choice		Feedback
	Because only trained professionals should deactivate equipment	Incorrect - it's to prevent employees from being hurt when equipment starts unexpectedly.
X	To prevent injury from the unexpected start-up or re-energization of equipment or machines while performing maintenance or servicing activities.	Correct! It's to keep people safe from harm.

Correct	Choice	Feedback
	Because the equipment warranty is void if someone activates equipment improperly	Incorrect - it's to prevent employees from being hurt when equipment starts unexpectedly.
	Because I don't have enough things to worry about	Incorrect - it's to prevent employees from being hurt when equipment starts unexpectedly.

4. All Kaiser Permanente facilities have implemented an Energy Control (Lockout/Tagout) Program.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
X	True
	False

5. Which of the following are potentially hazardous energy sources?

(Multiple Response, 10 points, 1 attempt permitted)

Correct	Choice
X	Electricity
X	Compressed Air
X	X-Ray
X	Hydraulic line forces

6. If you see that a tagout has fallen off, you must inform your supervisor and the maintenance person identified on the tag immediately.

(True/False, 20 points, 1 attempt permitted)

Correct	Choice
X	True
	False

MOC Waste Management

1. Who is responsible for placing waste in the appropriate waste bin?

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	Only Managers and Supervisors
X	Every Kaiser Permanente employee, physician and contingent worker
	Only Environmental Service Workers
	Regulatory agencies that create laws and rules we must follow

2. What should you do if you find patient health information waste that was improperly disposed in regular trash?

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	Take no action
	Hide the waste
X	Immediately report the issue to your supervisor or to the Compliance Department

3. Where should you place paper for disposal?

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
X	Confidential waste container
	Recycling waste container
	Regular trash container

4. Why is properly disposing of used needles in sharps containers important?

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	It is required by the law
	It is required by KP policy
	It prevents accidental needlestick from occurring
X	All of the above

5. It is acceptable to dispose of a keyboard in regular trash.

(True/False, 10 points, 1 attempt permitted)

Correct	Choice
	True
X	False

6. Where should you place gauze with visible fluid blood for disposal?

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
X	Red Bag (biohazardous) waste container
	Confidential waste container
	Regular trash container
	Hazardous waste container

7. Who should you contact if you are not sure how to dispose of waste?

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
X	Your supervisor/department manager, the EH&S professional or Compliance Officer supporting your site
	Security Guard
	Nobody

8. Where should you dispose of paper generated from work activities?

(Multiple Choice, 10 points, 1 attempt permitted)

Correct	Choice
	Universal waste container
	Regular trash container
	Recycle container
X	Confidential waste container
